

Date:

Wednesday Challenge Form

Group Members: Zach, Monte, and Justin.

Problem Statement: We must make a model of a capital e in Sketchup. The models are randomly exchanged between groups, and then we make the e model out of cardboard. The two groups decide which e is closer to the model, and then it is judged. The e c closest to the sketchup wins.

Approach: We got a ridiculous model, so we just cut a flat piece of cardboard into an e.

Solution:

Lessons Learned:
